Overall View of CFF Malaysia

- : already established in the center.
- : to be established in future

Aiming at the sustainable orphanage management

Sustainable design in collaboration with local residents

1. For earth(environmental) system
2. For social (economical) system
3. For human(welfare) system

Future oriented system for economical independence, self-reliance and coexistence

Products with the aim of sustainability in environment, finance and welfare

Organic soap (including extract of lemon glass, moringa etc)

Sell at ① CFFM site at ② local site

Papaya

Rubber farm

Seeking for self-reliance

Fish Nursery

Outline of ten-years plan for realizing the systems

- **Environment:** establish the base of sustainable life by utilizing recycling energy and systems.
- **Economy:** independent management by utilizing land for ecological farm and selling the products.
- **Welfare:** management as social producer (by connecting the eco-preserving farming, children nursing and vocational training)

Final goal:

1. Propose a model for developing local area through social welfare work.
2. Future oriented welfare work responding to the future objectives for environment preservation and economical independence.
3. Find the solution of social problems in Sabah; responding to research data.
